

## TAIGA TRAIL HARNESS

New from TaigaAlaska, we are introducing the Trail Harness. This simple harness was developed to be an easy alternative for ski-joring, mushing or just walking your dog. The nylon webbing is 3500 lb. test strength with waterproof 1.9 oz. coated ripstop nylon over 3/8" thick closed-cell foam at the neck. The breastpiece is waterproof cordura wrapped around foam in a manner to minimize rub problems from any side pull on the harness. The metal ring is nickel plated steel with a welded joint for strength and the plastic buckle is the best quality available. As with all Taiga products, these harnesses are made in Alaska and made to last. The neck sizes from extra small to extra large are the same as the Taiga low impact or standard harness, just match the tug color to fit.

### SIZES

Black tug, extra small, fits 18" neck  
Green tug, small, fits 19" neck
